

TECTONIC

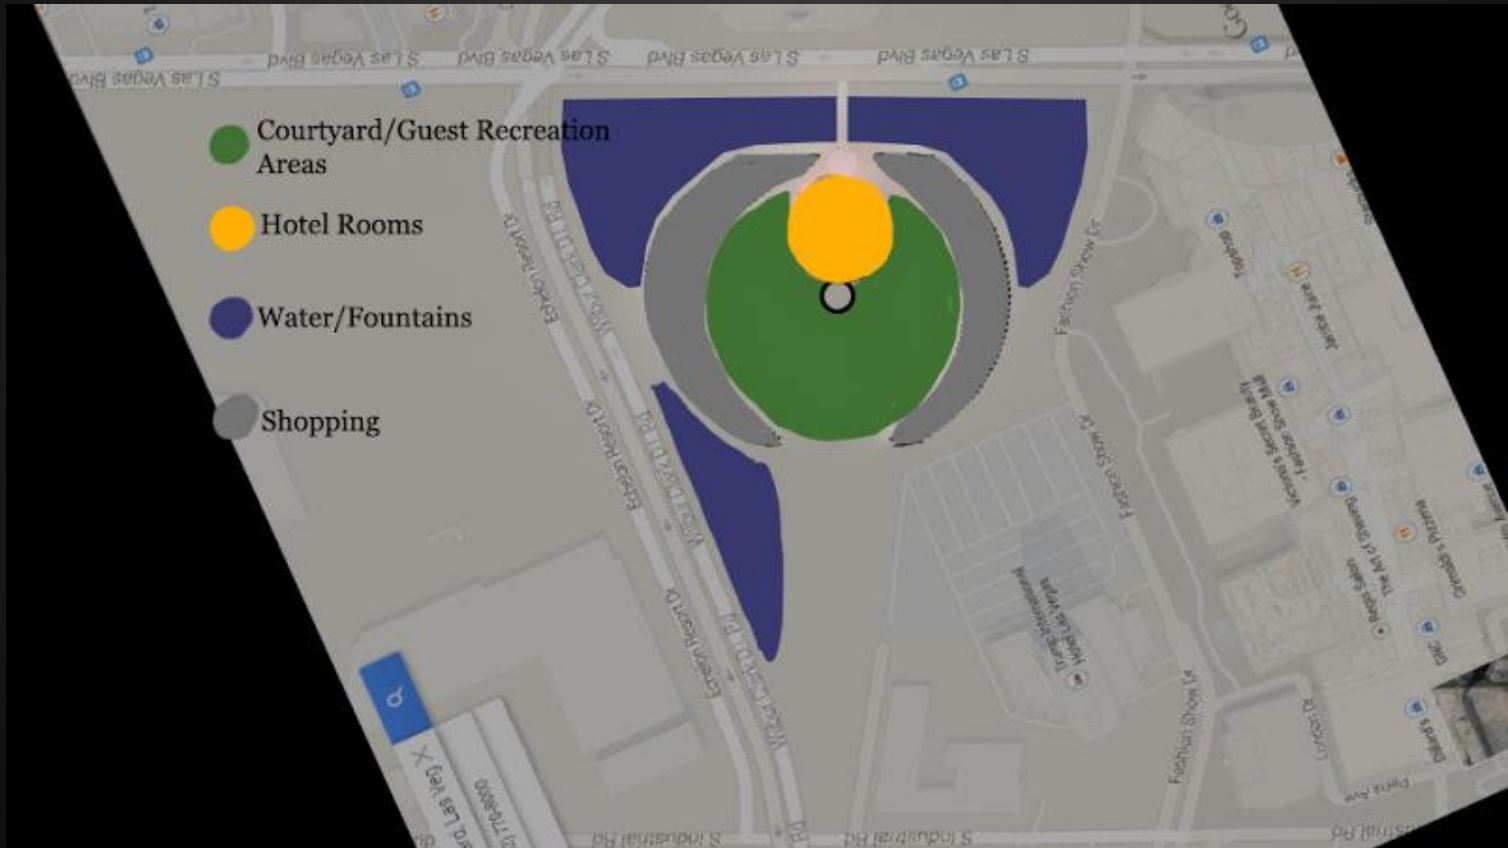

Energy release associated with rapid movement on active faults is the cause of most earthquakes.

This fault is active.

Two lovers, two colossal Titans, embodied in tectonic plates, meet at this fault with a love so tempestuous and fiery, it shakes the earth.

When two tectonic plates catch on each other, they reach an impasse. They jam and the energy builds until it can't build anymore.

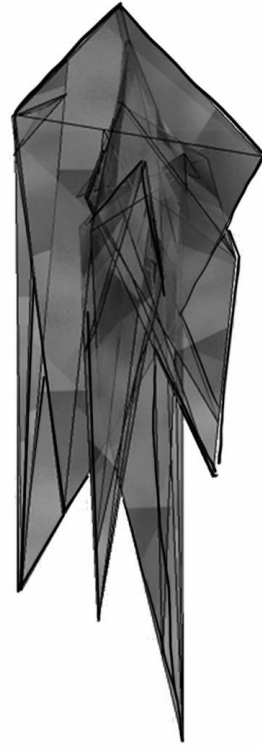

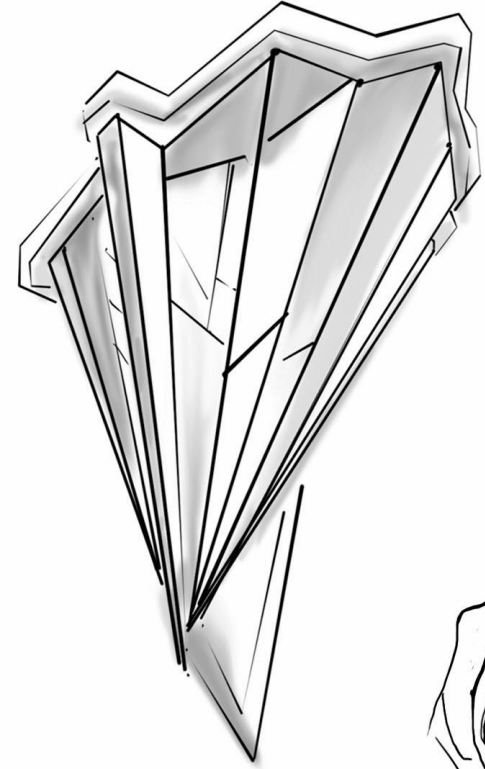

With a love so volatile, you never know when the Titans will break free. And they do, every night, in a spectacular and explosive burst of volcanic passion.

The story of offering and sacrifice is as old as time itself. Here, in the dark recesses of the fault line, the native people have gathered to offer tribute to the volcano, to appease its red-blooded eruptions and to respect its power, in a primitive, transformative spectacular.
